

Colour Range

Living with

Freefoam manufacture a range of lead-free PVC profiles and accessories for roofline, cladding, and rainwater applications to suit any property or structural design.

Products are available in a wide range of colours including pure white, leather brown, deep brown, black, wine red, rustic green, regal blue, storm grey, sable and pale gold. A further extended colour palette is also available for those special structural designs and innovative construction.

Woodgrain finishes come in traditional mahogany, black ash, light oak and rosewood for an authentic timber-look without the associated maintenance.

The range of colours – generally considered to be the largest on the market – lets you choose a shade that best matches the characteristics of the property.

All products are manufactured using an environmentally-friendly advanced calcium zinc formulation for superior colourfastness and are guaranteed for up to 20 Years against warping, cracking and discolouration

(full details of extended guarantee scheme are available at www.freefoam.com)

Care & Installation of Coloured Products

When handled, stored and installed correctly coloured profiles will remain 'fit for purpose' throughout the period of guarantee

Handling & Storage

- Coloured cellular foam products should be stored internally in their light-reflective white tubing until immediately before installation
- Coloured hollow/rigid products should also be stored internally and away from direct sunlight
- Coloured boards should never be stored externally, or left exposed on the ground or on van roofs pending installation

Installation

- Maximum nailing centres of 300mm are recommended for colour and woodgrain boards with the top row of nails within 30mm of the edge.
- Hollow rigid products should be installed only in areas shaded from direct sunlight such as soffits, porch ceilings, internal cladding, etc.

General installation guidelines for Freefoam products are outlined in our Technical & Specification manual (call your local number at the back of this leaflet for a copy).

Defects or problems caused by mishandling or incorrect installation will not be covered under the Freefoam guarantee.

Living with

All Freefoam products are available in white.

This is a listing of the products that are also available in a range of colours.

Please see the product catalogue for the full range of products.
